

З М І С Т

BEDRATYUK L., LUNIO N. Intertwining maps for the Weitzenböck and Che- byshev derivations	3
PROTASOV I. V. A note on bornologies.....	13
BARDYLA S. On locally compact semitopological graph inverse semigroups	19
KURYLIAK A., TSVIGUN V. Wiman's type inequality for multiple power series in an unbounded cylinder domain.....	29
ZAYED H. M., BULBOACĂ T. Sandwich results for higher order fractional derivative operators.....	52
NURAY F., PATTERSON R. F. Vector-valued bivariate entire functions of bounded index satisfying a system of differential equations.....	67
BANDURA A. I. Analytic functions in the unit ball of bounded value L -distri- bution in a direction.....	75
BARANETSKIY YA. O., KALENYUK P. I., KOLYASA L. I., KOPACH M. I. Nonlocal multipoint problem for an ordinary differential equations of even order involution	80
HUKALOV O. O., GORDEVSKYY V. D. Infinite-modal approximate solutions of the Bryan-Pidduck equation.....	95

П Р О Б Л Е М И

SKASKIV O. B. Progress in the open problems in theory of functions of bounded index.....	109
